# REPORT OF THE DIRECTORS

TO THE ANNUAL MEETING OF THE FULL BOARD, APRIL 4, 1864.

GENTLEMEN :

IN behalf of the Directors, I beg leave to submit to you the following Report, showing the condition of the affairs of the Board. The amount of assets on hand at the last Annual Report, was \$6,704.34, made up of the following items, viz. :

Cash in hands of the Treasurer.....	\$1,945.19	
" " " Secretary.....	59.15	
U. S. 7 3-10 Bonds.....	2,000.00	
J. S. Newhouse's note.....	2,700.00	
		<u>\$6,704.34</u>

The following is a statement of the affairs of the Board during the past year ; assets made up of the following items, viz. :

Cash in Treasurer's hands.....	\$2,644.66	
" Secretary's " .....	1,353.73	
U. S. 7 3-10 Bonds.....	2,000.00	
Jno. S. Newhouse's note.....	2,700.00	
		<u>\$8,698.39</u>

The receipts for the past year amount to.....\$45,908.21  
from the following sources, viz. :

Cash on hand last Report.....	\$1,953.82	
For Inspection.....	26,941.44

" contingent expenses, rent, fuel, gas, repairs, station- ery, printing, etc.....	6,886.52	
		<u>\$41,909.82</u>

The War Committee have a balance on hand, of \$5,129.79.

The amount assessed on each member for the succeeding year is ten dollars.

At a previous meeting of the full Board, it was recommended that the rules be so amended as to require the payment of twenty-five dollars as the initiation fee, instead of five dollars, as heretofore; also, that a special assessment of twenty-five dollars be made on each member. Inasmuch as the recommendation to create a special assessment was rescinded, we now advise that the recommendation to change the rule relative to the initiation fee be reconsidered, as there is no apparent cause for such extra charge for membership

The members of this Board are ever ready to respond to all calls of necessity, and if by their acts they have gained a high reputation for benevolence, they should not be unwilling to allow others to participate in carrying out the same object.

The amount of the initiation fee is not one of the questions taken into account when a man is proposed for membership. The character and standing of the applicant is the only matter for consideration.

The present and prospective increase in the business of the Board has rendered it indispensable that a much larger exchange room should be provided, hence your Directors, sustained by action of the full Board, have taken steps to secure such accommodation as in their judgment will be suitable for years to come.

Arrangements have been made with the Chamber of Commerce to erect a building on the lot at the south-east corner of Washington and La Salle streets, 93 feet by 180 feet. The ground has been purchased for the purpose, and negotiations for plans of the building are being made, furnishing an Exchange Room 132 feet by 88 feet in the clear, or nearly three times the size of the Hall now occupied by the Board. The capital stock being largely owned by the members of the Board of Trade, the interests of both institutions are nearly identical. It is hoped that our next Annual Meeting will be held in the new Exchange Rooms.

Good architects give it as their opinion that the structure can be completed and ready for occupation on the first day of May, 1865, at the latest. It is intended that the material and construction of the building will be of such a character as will reflect credit upon, and stand as a monument to the business enterprise of all who may participate in its erection and permanent occupation.

We have passed through another year of great prosperity in trade and commerce, and many of the members of this association have made fortunes the past season in their legitimate business.

When we look at the great influx of population among us, and its continual increase, and yet see the great Western Prairies are scarcely developed of their agricultural resources, we should prepare our minds at once to comprehend the greatness of this productive country. We require extra facilities for transportation; we want more railroads, we want more canals, more vessels, and more money, to transact business in a country so prosperous as this.

Many of our members and citizens have gone forth to the field of battle, to sustain us as a nation, and many have sacrificed their lives in aiding to maintain the laws of our land.

The members of this Board have paid their money freely to relieve the wants of the suffering. They are now paying out money contributed by themselves and other citizens, for the relief of soldiers' families, and will continue to do so until the fund now in their hands is exhausted, and then, doubtless, will appeal to their own members and others to aid them in carrying on this noble work.

Since I have had the honor to preside over this association, I have ever made it my study to unite and harmonize the interests of all its members. I have felt the deepest anxiety that this noble body of men should be among the highest of their mercantile associates in position and fair dealing, and I sincerely hope that whoever may be chosen as my successor, will be able to impart a greater influence in this direction than I have done.

In conclusion, permit me to say that my connection with this Board has been attended with the greatest pleasure and satisfaction to me, and I thank you for the kind attention you have given me, and for the manner in which you have received my efforts in discharging the duties of my office since having the honor to preside over this honorable and patriotic body.

JOHN L. HANCOCK.

CHICAGO, April, 1864.

To JNO. L. HANCOCK, Esq.,

PRESIDENT OF THE BOARD OF TRADE :

SIR,—I have the honor to submit the accompanying Report of the Trade and Commerce of Chicago for the past year.

By a resolution of the Directors, the statistical year was changed from the 31st of December to the 31st of March, the close of the fiscal year of the Board. This change, which was very much to be desired, has required the compiling of a supplement to the preceding Report ; but, instead of issuing the Supplement separately, it has been arranged under the different headings of this, thereby facilitating comparisons of statistics for the same months of preceding years.

The Board is to be congratulated upon a year of unexampled prosperity. Never since its organization has it been so strong in numbers, nor so efficient in influence as now. With a roll of nearly thirteen hundred members, embracing men in every branch of commercial business, it stands as a monument of the enterprise and business ability, that, in a few short years, has changed the wild prairie into a beautiful city, and an insignificant bayou into a river, the tonnage of which exceeds that of any other of equal dimensions in the world.

Without participating in the political differences of the day, the Board has stood among the first of similar corporations in giving aid to sustain the country and the country's cause. Three regiments of Infantry, and a Battery, have been sent to the field through its influence, and the sum of Fifty Thousand Dollars was collected and appropriated for the assistance of the families of those who had gone to war under its auspices. Beside this amount, various sums have been raised for Sanitary purposes, bringing the aggregate of collections and subscriptions to nearly Eighty Thousand Dollars.

Since making up the last Annual Report, Seth Catlin, Esq., late Secretary of this Board, has been removed by death. Almost from its organization he had filled the office of Secretary, with judgment, faithfulness, and ability. The resolutions of regret and sympathy passed by the members of the Board, and the beautiful monument erected over his remains in the Cemetery at Rose Hill, are but a deserved evidence of the appreciation of the services of a faithful officer.

I desire here to acknowledge the courtesy of the Officers and Agents of the different Railroads and Transportation Companies, of the Illinois and Michigan Canal, and of the Collector of the Port, for the facilities extended in procuring statistics ; and to express my gratitude to you, sir, and to the Directors and members of the Board, for the uniform kindly feeling which has been so generously extended toward me.

With high consideration, Sir,

Your very obedient servant,

JNO. F. BEATY, SECRETARY

SECRETARY'S OFFICE, BOARD OF TRADE ROOMS,

# GRADES OF GRAIN AND RULES OF INSPECTION

ADOPTED BY THE

BOARD OF TRADE OF THE CITY OF CHICAGO,

AUGUST 22, 1863.

---

## WHEAT.

### *Winter Wheat.*

No. 1 WHITE WINTER.—To be pure white winter wheat, sound, plump, and well cleaned.

No. 2 WHITE WINTER.—To be pure white winter wheat, reasonably clean, and such as will make sound flour.

No. 1 RED WINTER.—To be pure red winter wheat, sound, plump, and clean.

No. 2 RED WINTER.—To be pure winter wheat, red, or red and white mixed, reasonably clean, and such as will make sound flour.

REJECTED WINTER.—To include inferior or dirty winter wheat, but not so badly damaged as to render it unfit for flouring.

NO GRADE.—All winter wheat so badly damaged from any cause as to render it unfit for flouring, to be passed "No Grade."

In case of a mixture of red and white winter wheat, where the quality of each is strictly No. 1, the Inspector may class it as No. 1 Red.

All winter wheat to be weighed, and the weights to be entered on the inspection books and cards, as is done in the inspection of spring wheat.

### *Spring Wheat.*

AMBER.—To be sound, plump, and well cleaned spring wheat, of bright amber color—a strictly choice flouring wheat.

No. 1 SPRING.—To be sound, plump, and well cleaned, good flouring wheat.

No. 2 SPRING.—To be reasonably clean, and free from other grain, and such as will make sound flour.

REJECTED SPRING.—To include inferior or dirty spring wheat, but not so badly damaged as to render it unfit for flouring.

NO GRADE.—All spring wheat so badly damaged from any cause as to render it unfit for flouring, to be passed "No Grade."

Black Sea wheat in no case to be passed as a higher grade than No. 2 Spring—and Rice wheat no higher than Rejected.

Very hard or flinty piffe wheat, though in other respects No. 1, to be passed as No. 2 Spring.

All spring wheat to be weighed and entered on the Inspector's books as heretofore.

## CORN.

### *Pure White, Pure Yellow, No. 1, No. 2, Rejected, and No Grade.*

No. 1.—To be sound, dry, and well cleaned.

No. 2.—To be dry, merchantable corn, but not sound or clean enough for No. 1, and such as is largely mixed with red colored corn, though otherwise No. 1.

REJECTED.—All dry corn not so badly damaged as to be unfit for manufacturing purposes.

All wet or hot corn, or such as is in process of heating, or such as is unfit for manufacturing, to be passed "No Grade."

#### R Y E.

No. 1 RYE.—To be sound, plump, and well cleaned.

No. 2 RYE.—All rye not included in No. 1, that is not, in the judgment of the Inspector, unmerchable.

REJECTED RYE.—All rye that, from any cause, shall be deemed unmerchable.

#### O A T S.

No. 1 OATS.—To be sound, free from other grains, and well cleaned.

No. 2 OATS.—All other oats not unmerchable.

REJECTED OATS.—All Oats dirty, unsound, or from any cause unmerchable in the judgment of the Inspector.

#### B A R L E Y.

No. 1 BARLEY.—To be plump, bright, clean, and sound.

No. 2 BARLEY.—To be sound and reasonably clean.

REJECTED BARLEY.—Unsound or very dirty.

All "No Grade" grain being, by the above rules of inspection, of a very poor quality, all warehousemen are respectfully and urgently requested not to receive it into their several elevators.

And all Inspectors must make their reasons for grading grain, when necessary, fully known by notations on their books.

At a meeting of the Board of Directors of the Chicago Board of Trade, the following recommendations were adopted as rules of the Board:

1. That all grain arriving in bulk be inspected and received into the house for such grade only as the Inspector shall decide, except when sold on the track for grinding, city consumption, or shipment, and the Inspector shall in no case make the grade above the lowest quality found in any lot of grain, when it has evidently been mixed or "doctored" with the view of changing the grade, and that our warehousemen be requested to refuse all bagged grain which shall have been bagged for this express purpose, and that all our railroad companies be requested to prohibit all bagging on their tracks, except for local consumption or shipment.

2. That it be made the duty of all Inspectors of grain to report to the Inspection Committee all attempts to defraud our inspection system. They shall report in writing every instance when warehousemen deliver, or attempt to deliver, grain of a lower grade than that called for by the warehouse receipt. They shall also report any and every attempt of a receiver or shipper of grain improperly to instruct or in any way influence the action or opinion of the Inspectors, and also all other attempts to defraud the inspection system, and when the charges shall be sustained, it shall be the duty of the Inspection Committee to post the same on the bulletin board of the Exchange rooms.

It shall be the duty of the chief Inspector to keep a record of the weight of grain inspected into and out of each warehouse, which record shall be open to the inspection of any member of the Board during business hours, and that he report daily to the Secretary the average weight of the receipts and shipments of each grade into and out of each warehouse, which report shall be posted on the bulletin board. ]

# CLASSIFICATION OF FLOUR, AND RULES OF INSPECTION,

ADOPTED BY THE  
BOARD OF TRADE OF THE CITY OF CHICAGO,

MAY 26, 1863.

---

1st. SOUND. To be strictly sound, free from any and every defect or fault causing either smell or taste.

2nd. WEEDY. Flour made from wheat that has come in contact with a noxious weed, imparting an unpleasant smell, which it is supposed will cook out.

3rd. UNSOUND. All flour not "Sound" or "Weedy," whether the unsoundness is derived from the condition of the wheat, or has originated in the flour. The Inspectors are required to note on their certificate the character of the unsoundness, such as *musty, hard sour, soft sour, or slightly unsound*—the latter explanation of the unsoundness being intended to indicate that the flour will probably work sound for immediate use, and is but slightly depreciated in value.

All flour that inspects "*sound*" and full weight, shall be branded, and none other; and it shall be the duty of the Inspectors, when working to a sample, to state on their certificate the number of barrels above or below the sample, and have a sample or samples of the same, which the parties may examine; also to state on their certificate, when the flour is "Unsound" or "Weedy," the number of barrels of each description, and also, when practicable, the number of barrels that are so stained or out of condition as to depreciate the market value of the flour. The Inspectors shall satisfy themselves in regard to the weights, and in case they deem it necessary to strip some of the flour, they shall be entitled to twenty-five (25) cents for each barrel so stripped (if it proves to be short weight) in addition to the regular fee of two cents per barrel for inspecting and branding. The charge for stripping shall be paid by the seller. No certificate shall be issued for a part of a lot of flour inspected, without the consent of both the buyer and seller. The Inspectors shall only be liable to damage for any discrepancy between the flour for which a certificate is issued and the sample which they retain of the flour so inspected, unless the buyer hands them the sample to inspect by.

*Rules for the Adjustment of Short Weight of Flour, in the absence of any special understanding between Buyers and Sellers.*

1st. Flour shall be sold on the basis of one hundred and ninety-six pounds to the barrel.

2nd. In case of short weight, the buyer shall be allowed for such shortage at the rate he pays, and three-fourths of a cent per pound on same for freight, and, in addition, five (5) cents per barrel for the expense of refilling.

## FLOUR.

The receipts of Flour in Chicago, during the year ending March 31, 1864, amount to 1,424,055 bbls. against 1,666,391 bbls. during the year previous. This falling off is due almost entirely to the lightness of the wheat crop of 1863 as compared with that of 1862. The quality of the Flour manufactured, however, was much superior to that made from the crop of 1862, and the trade altogether was more satisfactory and healthy. The shipments of flour during the year ending March 31, 1864, amounted to 1,507,816 bbls., and the amount manufactured in the city during the same period was 223,123 bbls.

## WHEAT.

The receipts of Wheat in this city, during the year ending March 31, 1864, amounted to 12,461,554 bushels, against 13,978,116 bushels during the preceding year. This falling off in the supply is mainly due to the light crop of 1862, the receipts from which show a falling off, as compared with the crop of 1861, of nearly three millions of bushels. The crop of 1863 was excellent, both as to quality and yield; but, owing to the scarcity of laborers in the country, the army having drained the North-west of a large portion of the agriculturists, the grain has not been brought to market as early as usual. The shipments of Wheat during the year amount to 10,759,152 bushels, against 13,808,898 bushels in 1862.

It is a noticeable feature in the progress of this trade that we are drawing more largely than ever before from Northern Wisconsin, Northern Iowa, and Southern Minnesota, and this has contributed in no small degree to a decided improvement in the character and reputation of our Wheat in Eastern and European markets.

In the tables which follow will be found complete and reliable statistical tables, giving the receipts and shipments, with the sources of supply, and the route of shipment.

CORN.

The Corn trade during the past year shows a material falling off from the twelve months preceding. The receipts during the year ending March 31, 1864, amounted to 25,160,516 bushels, against 29,574,328 bushels received in 1862. This decrease in the receipts is wholly due to the heavy frosts which damaged the new crop at the end of August and the beginning of September, 1863, in consequence of which farmers and stock-raisers were forced to keep back their old crop for feeding purposes, which would otherwise have been sent to market. But for these fatal frosts, our receipts of Corn during the past year would have been greater than in any preceding year of our history, as a comparison of the supply up to the 1st of September last will fully demonstrate.

By reference to the table of prices of Corn which follows, it will be seen that the market value increased rapidly after the 1st of September, the period when the new crop was struck down by the frost, and as the year advanced, prices went beyond all precedent in the history of this market.

## OATS.

The receipts of Oats, for the year ending March 31, 1864, amount to 11,005,743 bushels, against only 4,688,722 bushels during the preceding year. This extraordinary increase in the supply of Oats is attributable solely to the active demand which has existed for two years past by the army, and the consequent high prices which ruled. The production of Oats was not only stimulated all over the country, but the farmers sold more closely than ever before, reducing their own wants as much as possible by the substitution of other grain.

The shipments of Oats, during the year, amount to 9,909,175 bushels, which is more than three times the amount ever before shipped from this city in a single year. Not only have we shipped more largely by Lake than during any previous year of our history, but there is not a railroad running south, south-west, or south-east, but has been taxed almost to its utmost capacity in forwarding Oats to the various armies in the field. The principal contracts let all over the United States have been filled chiefly at Chicago by our own merchants, acting either as principals or agents.

## PRICES OF OATS.

The table given below shows the weekly prices of Oats in this market for two years past. As will be seen, No. 1 Oats were sold here, in April, 1862, as low as 18 cts. per bushel, after which they advanced steadily till October, 1863, when the price reached 72 cts. per bushel.

## RYE.

The receipts of Rye, during the year ending March 31, 1864, amount to 747,295 bushels, against 1,038,825 bushels during the year 1862. This decrease in the supply of Rye is due partly to the comparatively light crop of 1863, but mainly to the active local demand which has existed for it by distillers throughout the North-west—the scarcity and high price of corn since September last having induced a greater consumption of small grain in the manufacture of highwines. As is well known, too, the distilleries all over the country, during the period named, have been generally running night and day, and their requirements were proportionately greater.

The shipments of Rye, during the year ending March 31, 1864, amount to 683,946 bushels, against 871,796 bushels in 1862. Of the amount shipped during the past year, only 572,850 bushels were shipped by Lake—the balance having been shipped by railroads to supply distilleries all over the Western and North-western States.

## PRICES OF RYE.

The following table shows the weekly prices of Rye in Chicago for two years past. By reference to this table, it will be seen that prices have advanced from 38 cts. for No. 1 Rye, in April, 1862, to \$1.07½ in December, 1863. As soon as the frost struck down the Corn, the price of Rye advanced with that of Corn, and this sympathy between the two kinds of grain, continued up to the close of the year.

## BARLEY.

The receipts of Barley during the year, ending March 31, 1864, foot up 1,244,584 bushels, against 872,053 bushels in 1862; an increase during the past year of 372,531 bushels. This is attributable mainly to the superiority of the crop of 1863, both as to yield and quality, over that of 1862.

The shipments of Barley, during the year ending March 31, 1864, amount to 943,252 bushels, against only 532,195 bushels in 1862; an increase during the past year of 411,057 bushels. During the fall of 1863 a very active demand existed by Eastern shippers, and large quantities were shipped to markets which have been mainly supplied by Canada West and New York.

## PRICES OF BARLEY.

The following table shows the price of Barley each week during the past two years. As will be seen by an examination of the various columns, prices during the past year are much higher than in 1862. This is partly owing to the superior quality of the grain, as compared with 1862.

THE PROVISION TRADE.

The progress of the Provision Trade of Chicago has scarcely a parallel in commercial history. Dating back but a few years, we find that Chicago stood behind Cincinnati, Louisville and St. Louis, at least so far as Hogs and Hog Product were concerned; and now she stands first in the list of both pork and beef packing points—the operations of the past season leaving Cincinnati—so long known as the Porkopolis of the United States—as far in the rear as Chicago was behind her five years since. The same natural causes which made this the greatest interior grain market in the country, has also made it the greatest collecting point for hogs and beef cattle. Connected by a perfect net work of railroads with the great North-western States, Chicago is the natural depot for the receipt of their produce, and it is the best general distributing point. No matter what market is the best, the facilities for shipping are unequalled—whether it be to the South, or the North, the East or the West. With the lake trade and its shipping, produce can be carried cheaper from Chicago to the East, than from any other market in the West; and in the winter season there are four great lines of railroad connecting us with the seaboard, striking as far north as Quebec, and as far south as Baltimore.

What immense proportions this trade will yet assume, it would be vanity to predict; but that it will grow with the development of the North-West, now but in its infancy, there can be no reasonable doubt.

In the pages which follow, will be found complete and reliable statistics of the receipts and shipments of hogs and beef cattle, beef and pork packing, etc.

The table given below gives the particulars of the Pork Packing at Chicago during the season of 1863-4. It will be seen that the number of Hogs packed during the season was 904,659, against 970,264 during the preceding season. This falling off, it is almost needless to state, was caused by the shortness of the Hog crop during the past season—and also to the scarcity of Hogs in Eastern markets, in consequence of which very large quantities of Hogs were shipped East before the close of the season, at greatly enhanced prices, to supply the butchers of New York, Philadelphia, and other large cities. Under all the circumstances, it has been truly a matter of surprise that so many hogs were packed here during such a season, as the falling off at many of the leading packing points was equal to nearly one hundred per cent.

## BEEF CATTLE AND BEEF PRODUCT.

This branch of the Provision Trade has attained a magnitude, of which no other interior city except Chicago can boast. The progress of the trade during the past year has been truly wonderful. According to our tables of statistics, given elsewhere, the receipts of Beef Cattle for the year ending March 31, 1864, amount to 300,622 head, against 209,655 head received in 1862—an increase in one year of 90,967 head. The shipments of Beef Cattle during the same period amount to 187,068 head, against only 112,745 head in 1862—an increase of 74,323 head.

The trade in Cattle has been stimulated to no small extent by the demand which has existed during the past two or three years to supply the armies of the United States, and it is needless to state that contractors have had to depend chiefly on the supplies from Chicago to fill their contracts. The trade with New York alone is immense, as the statistics of the Cattle trade of that city demonstrate. During 1863, there were received in New York city, 264,091 beeves, of which no less than 118,692 head were from Illinois.

## THE LUMBER TRADE.

The receipts of Lumber, during the year ending March 31, 1864, amount to 413,301,818 feet, against 305,674,045 during the preceding year—showing an increase for the year, of 107,627,773 feet. With the exception of the years 1856 and 1857, the receipts during the past year are heavier than in any previous year of our history ; and taking the trade altogether, including both dealers and manufacturers, it has been a season of unexampled prosperity.

The trade in Shingles, during the year, has also been unusually brisk—the receipts amounting to 172,364,878, against 131,255,000 in 1862. The amount manufactured in the city, however, is not included in these figures, and the increase in this particular has been unusually heavy. A noticeable feature of the Shingle Trade developed during the past year, is the receipt of 19,335,878, by the Chicago and North-western Railroad—which has been extended to Green Bay since the date of our last annual review. It is also worthy of note, that sawed Shingles, which, but a few years since, were considered inferior to shaved, are now preferred, and generally command higher prices than shaved.

## HIDES.

Chicago has, for many years, been one of the most important markets for Hides in the United States. In the tables below will be found correct statistics of the receipts and shipments of Hides for a number of years. In the receipts, however, is not included those taken from cattle slaughtered in the city, neither in the shipments the number tanned in the city. The prices have ranged higher than ever before.

## HIGHWINES.

The receipts of Highwines, during the year ending March 31, 1864, amount to 137,947 barrels, against only 61,703 bbls. in 1862. The shipments during the same period foot up 159,312 bbls., against 100,170 bbls. shipped in 1862.

This extraordinary increase in the trade of Highwines, it is almost needless to observe, is due mainly to the manufacture being stimulated all over the country by the prospects of increased excise duties—the high prices which ruled having afforded distillers an unusually large margin, and encouraged them to run their establishments to their fullest capacity. In connection with this increase in our trade in Highwines, it is also proper to state, that during the past year, a large portion of the manufacture which were formerly shipped to other markets, now comes to Chicago, as the best distributing point.

Below will be found tables showing the amount of Highwines manufactured in this city during the year, with comparative statistics.
